EXECUTIVE SUMMARY

FinTech product leader across **payments**, **real-time risk**, **digital banking**, regulated cloud and **transaction** infrastructure. Translates **regulatory** and market-structure constraints into **product requirements**, **decisioning** systems, onboarding and payment workflows, balancing growth, unit economics, security and **risk**. Brings **digital banking**, **payments**, **credit/risk decisioning**, **KYC**, **data residency**, **RegTech** and **transaction** economics across enterprise and capital-markets workflows.

EDUCATION

University of Michigan, Stephen M. Ross School of Business - Master of Business Administration | 2022 - 2024

London School of Economics and Political Science - Executive Coursework, Economics, Markets & Public Policy | 2024

Indian Institute of Technology - B.Tech, Computer Science | 2010 - 2014

PROFESSIONAL EXPERIENCE

Amazon Web Services (AWS) - Regulated AI

Jul 2024 - Present | San Francisco, CA

Principal Product Manager, Financial-Services Platforms

- Directed a managed agent platform for **regulated** enterprise workflows, prioritizing access controls, auditable action traces, retention limits, human approvals and cost-quality routing for production use cases with high trust requirements.
- Led an **\$85M** buy-vs-build / acquisition evaluation for an agentic-AI operating system, defining technical diligence, integration planning and product economics; post-deal consolidation improved gross margin **55% to 81%**.
- Built product-level evaluation and guardrail requirements for high-**risk** AI outputs, combining human review, task-specific evals and policy-aware generation to reduce hallucinations to **2.8%**.
- Authored the Working Backwards PR-FAQ and **\$100M+** GMV sensitivity model that secured **\$5M** incremental funding, combining **regulated**-workflow requirements, platform economics and customer outcomes into an executive product and capital-allocation case.

Rakuten Group, Inc. - Payments

Jun 2023 - Dec 2023 | Tokyo, Japan

Product Manager, Merchant Economics - MBA Intern

- Evaluated **payments**, commerce and AI partnership structures using take-rate analysis, commercial diligence and ecosystem economics across **70+** business units and **50,000+** merchants.
- Stress-tested a **\$50M** consumer expansion with a **10,000**-iteration Monte Carlo model across CAC, churn and payback; redirected the product to a higher-value partnership model with LTV:CAC **0.8x to 4.5x** and payback **18 to 4** months.
- Identified a cross-device **transaction**-attribution gap and coordinated engineering, analytics, finance and merchant teams to restore **transaction** continuity and accurate revenue attribution.
- Evaluated **payments** and commerce opportunities using take-rate analysis, unit economics, partner structure and build-vs-partner trade-offs, translating **transaction** economics into product priorities for a platform spanning **70+** business units and **50K+** merchants.

Microsoft Corporation - Azure

Jan 2020 - Aug 2022 | Redmond, WA

Senior Product Manager, FinTech Cloud, Payments & Compliance

- Translated **regulated-financial-services** requirements into architecture, pivoting from fully homomorphic encryption to confidential computing and reducing inference latency **14s to 220ms**; cut time-to-**compliance** **9 to 3** months with zero breaches across customer engagements.
- Owned cross-border data-residency **product requirements** across **10** markets (GDPR/Schrems II, PIPL, SEC **17a-4**), rescuing a **\$5M** at-risk contract, winning a **\$2M** upsell and averting **\$25M** in fine exposure.
- Productized verified identity, approvals and event-triggered **payments**, reducing contract-to-cash **14** days to **<48** hours and supporting **~10x** partner volume.
- Added AI content-safety guardrails and a bias-testing sandbox to the **regulated financial-services** platform, codifying **compliance** controls as reusable launch gates and helping improve AI ROI **61%** while preserving zero-breach delivery.
- Defined reusable **regulated**-cloud deployment patterns for **financial-services** buyers requiring local data control, security validation and jurisdiction-specific architecture; translated policy into **data residency**, regional sharding, in-country key management and **policy-as-code product requirements** that reduced implementation from months to hours.

The D. E. Shaw Group - Financial Data Products

Jul 2016 - Dec 2019 | New York, NY & Hyderabad, India

Vice President, Real-Time Risk

- Led a **Basel III** real-time **risk** decisioning platform that cut latency **90ms to 4.2ms**, false positives **15% to 1.8%**, saved **~\$400K/month** and unlocked **~\$85M** in regulatory capital.
- Built intelligent financial-document processing with semantic extraction and confidence-based human review; reached **98%** automated-processing confidence and cut earnings ingestion from hours to seconds at **~70%** lower cost.
- Managed the platform as an internal product for trading, quant, **compliance**, legal and investment teams, defining service levels, controls and adoption measures tied to capital efficiency and deal velocity.
- Executed a Strangler-Fig migration with **90-day** shadow-mode validation and **98%** output agreement, scaling the **risk** platform to **5.4M** messages/sec with zero dropped packets through live market stress before production cutover.
- Owned the technical product and governance model for a **Basel III** real-time **risk** platform spanning **15+** engineers, five stakeholder groups and **~\$10M** capex, using Rust, Kafka, Flink, latency budgets, shadow validation and go/no-go controls to meet prudential **risk**, auditability and capital-efficiency requirements.

McKinsey & Company - Payments & Risk

Jul 2014 - Jun 2016 | London, UK

Associate, Digital Banking, Product Strategy

- Led the **0-to-1** launch of a Southeast Asian **digital bank** using alternative telco-data credit scoring across **400+** ML features, **eKYC**/liveness and a regulatory sandbox; scaled to **100,000** active users in **90** days with approval **10% to 40%**, **2.4%** NPL.
- Redesigned an institutional digital-asset brokerage around instant credit, maker-taker pricing and contribution-margin economics; supported volume growth **\$215B to \$371B** and recurring revenue **\$45M to \$213M**.
- Defined the ML **credit-scoring** product and model-**risk** framework, coordinating product, data science, **risk**, **compliance** and distribution partners across **400+** features while balancing approval growth, fairness, loss performance and regulatory constraints.
- Owned market sizing, acquisition economics, model-**risk** review and regulatory-sandbox alignment for the digital-bank launch, connecting credit approval, NPL performance, **eKYC** and distribution requirements into a coherent product and **risk** roadmap.
